

## **Exhibit “A”**

Saturday 9:37 AM

Mark, Welcome to the list!

I was new to the list just like you once... and a few individuals did take the time to help me learn and get my foot in the door.. I thank them very much. It's very hard to find OBD-II information.. so perhaps I can help.

I've put up a few web pages...

<http://obd2.dxsoftware.com>

On this page you will find some information about OBD-II, mainly the flash chips and the data they keep.. Hopefully I'll be updating this page as the day goes on and add more info in the up coming days. I will talk about how you can ready your Flash chip with an EMP-20 and what you can do once you have the data
